AI in Focus Program (2025-2028)

Inspire and enable the organization to **create value with AI**. AI is an essential **part of every DNB's toolbox**.

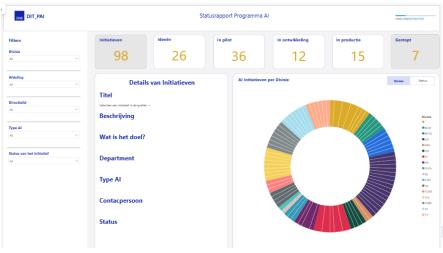

... in a **responsible and safe manner**, including through a *smart follower* approach

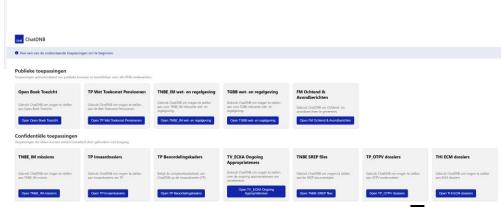

... This will enable DNB to remain decisive and agile in a rapidly changing world.

Enable: What are the biggest obstacles?

Bron: Al Multiple, https://research.aimultiple.com/ai-fail/, July 2023

Enable: Unclear business objectives

Unclear business objectives Where does the business want to go?
The AI Program underlines the

importance of a vision and strategy

- Business is about What
- Program AI about the How

Enable: Poor data quality

Poor data quality

The goals of the *Program Data* are also essential for successful AI

- higher data maturity
- data architecture compliance
- data availability
- data governance
- data literacy

Enable: Lack of collaboration between teams

Lack of collaboration between teams

- Domain specialists fulfill the "bridge" function between the business and Data Science/IT
- The program has oversight of all the initiatives and shares knowledge between the different organizational departments

Ethical issues

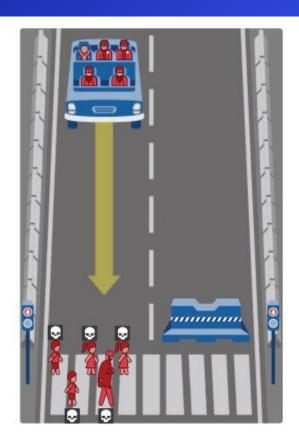

Ethics is thinking about doing well.

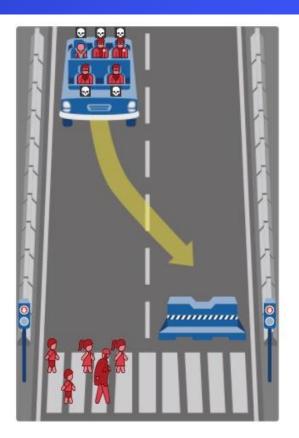

The central question is what is good to do in concrete situations

What should the self-driving car do?

Values determine design

Values play a crucial role in every design process and influence the final product and its usability

Which sauce ladle is more inclusive?

Dilemma's: In which cases do you find it necessary to mention explicitly that a text is generated by AI?

- Always
- When content or creative support has been provided
- Only when AI has provided substantial tekst input

AI in Focus programme is 70% about change management

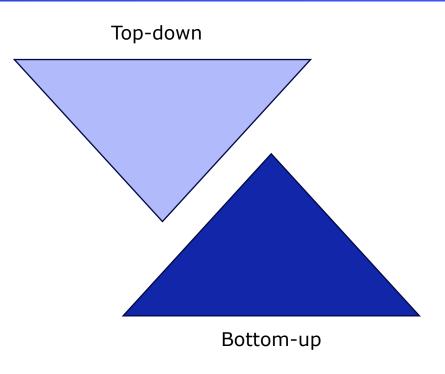

Bron: AI Agents

Top-down & Bottom-up change approach

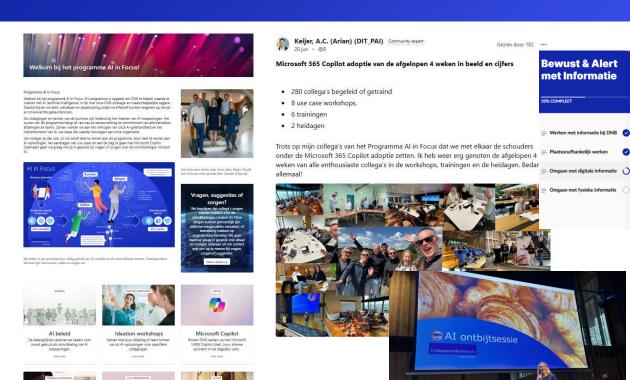

- Involve executive sponsors and sr. management from the start and inform them regularly to strengthen their steering role.
- Provide responsibility for value creation of AI use cases
- Treat them like a customer.

- Inspire, communicate and share knowledge
- Ask for ideas from the organization
- Adoption approach per team
- Spotlight successful projects

Bottom-up: We communicate, inspire and train our colleagues

Training & opleiding

Slimmer werken, maar wel veilig

Tijdens een brainstormsessie met haar projectgroep gebruikte Sanne bijna een gratis online whiteboard. Gelukkig checkte ze eerst of dat wel mocht – en ontdekte ze dat het gebruik van niet-goedgekeurde tools risico's met zich meebrengt. Sindsdien is ze extra alert op welke software ze gebruikt.

Een paar dagen later werkt Sanne aan een complexe analyse. Ze overweegt om een Altool zoals ChatGPT of Gemini te gebruiken om haar tekst te herschrijven en sneller tot de kern te komen. Ze heeft er goede dingen over gehoord. Maar dan vraagt ze zich af: mag ik dit eigenlijk wel gebruiken voor DNB-werk?

- Bij DNB mogen Microsoft 365 Copilot Chat of DNB Chat gebruikt worden.
- Je mag toegelaten Al-tool gebruiken voor informatie tot en met DNB Confidential.
- Hoger geclassificeerde informatie (DNB Secret) mag niet gedeeld worden met Al-tools – ook niet met Copilot.

DeNederlandscheBank EUROSYSTEEM

Value is much more than productivity

Organizations that integrate AI well benefit from happier staff.

- In companies that are well prepared for AI, the average happiness at work is 7.8.
- In companies without an AI strategy, this remains at 6.2.

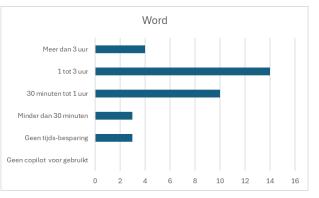

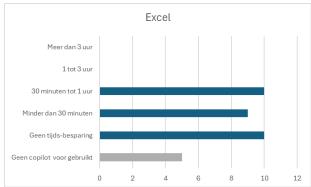

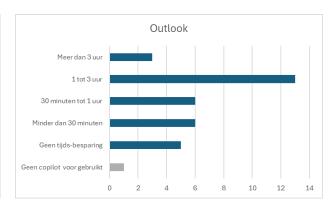

1-measurement (results May-July) (n=40)

- 1. Copilot contributes to more satisfaction, motivation and more challenging work (positive impact on happiness at work and motivation)
- 2. Collaboration and communication improve, but the effect on team alignment is mixed.
- 3. Copilot increases productivity

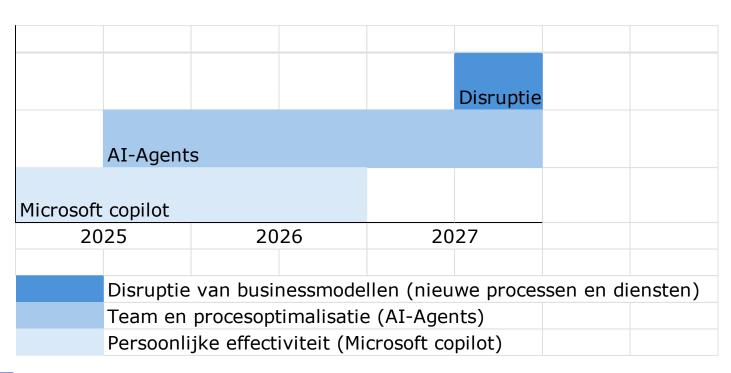

It is an evolution and not a revolution
