Important market infrastructure to the Finnish financial market

This Table provides a description of Finland's key payment and securities clearing and settlement systems and other significant actors in this field. The smooth and reliable operation of these parties is necessary for the stability of the financial markets. This table is updated annually.

Overseen infrastructure

Infrastructure	Description	Oversight responsibility ¹	Remarks
T2	Eurosystem's technically centralized RTGS-system based on a single shared platform. T2 is used for the transfer of euro-denominated interbank payments and customer payments, settlement of payments related to policy operations and funds transfers of key payment systems.	ECB (lead overseer), Eurosystem.	A general oversight assessment has been completed for the system based on the SIPS regulation and general oversight requirements related to cybersecurity. The system is largely compliant with the requirements.
T2- Suomen Pankki subsystem	Central bank money utilizing payment system which is technically and operatively functioning on the common TARGET-platform. Juridically this component is owned by Bank of Finland and it is also responsible for the national service center.	Bank of Finland; adherence to common principles with other Eurosystem T2 overseers.	
CLS	A significant settlement system for foreign exchange transactions.	US Federal Reserve (Lead overseer), ECB (Overseer of settlement in euro). Bank of Finland participates as member of the Eurosystem to the oversight of the system.	
EURO1	EBA Clearing's system for euro denominated large value payments.	ECB (Lead overseer), Eurosystem. Bank of Finland participates in the oversight of the system.	The system is currently assessed against relevant oversight principles.
POPS	Domestic large value payment system (Banks' online system for express transfers).	Bank of Finland.
