GUIDELINE

4 (50)

Version 1.2 (29 April 2020)

1 INTRODUCTION

This document describes the structure of records and the manner of submission of data to the Bank of Finland relating to the survey on other financial institutions ("OFI" or "MURA" in Finnish). OFI reporting instructions and classifications are provided in the document "Instructions for OFI statistical reporting".

The Bank of Finland can be contacted on questions relating to record structures and the submission of data at the email <u>MURA@bof.fi</u>.

Financial Stability and Statistics Department GUIDELINE

5 (50)

Version 1.2 (29 April 2020)

2 SUBMISSION OF DATA TO THE BANK OF FINLAND

OFI data must be submitted to the Bank of Finland no later than the last banking day of the month following the reference period. The data are submitted electronically using the DCS2 service (Data Collection Service).

2.1 DCS data transfer

Reporters submit the data to the Bank of Finland using the DCS2 data collection service. The DCS2 is maintained by the service provider, i.e. the DCS2 operator. The DCS2 operator is Posti Messaging Oy.

The reporter (or alternatively the data provider) must order a user ID for the DCS2 service in the reporting portal at <u>https://dcs.bof.fi</u>. After the order for an ID has been approved, a key code list is generated for the user. The codes are needed, in addition to the user ID and password, for logging in the DCS2 service.

The DCS2 service is used to create a report file consisting of reported data as described in the record descriptions presented in this document. The file is validated at the DCS2 service for data content, e.g. the technical integrity of the data and the correctness of record field structures and contents. These validations are made as described in this document.

A validated and approved report file is transmitted to the Bank of Finland. Erroneous reports are not transmitted to the Bank of Finland; instead, the DCS2 service sends an error report to the data provider. Errors must be corrected and the entire report sent again via the DCS2 service. Correspondingly, when a correction needs to be made to a report that has already been sent, the entire report must be sent again via the DCS2 service.

2.2 Testing

Reporting may be tested in the DCS2 service's separate test environment at <u>https://test.dcs.bof.fi</u> by designating the contents of the report as test data (see batch record field 5). Test reports are sent to the operator in the usual manner and the data are validated according to this record structure.

Financial Stability and Statistics Department GUIDELINE

6 (50)

Version 1.2 (29 April 2020)

3 REPORT FILE

Report files are created as CSV (Comma Separated Value) files using semicolons as separators. The character set used in the file must be UTF-8.

3.1 Naming of file

The name of the file is the code that identifies the survey, "OFI", the period subject to reporting and the data provider's VAT identification number without hyphen (for those operating in Finland, starting with FI, 8 digits), the reporter's VAT number and time stamp.

OFI_<YYYY>A01_<Data provider's VAT number>_<Reporter's VAT number>_<time stamp>.CSV.

If the reporter corrects data that has already been sent, the same file name must be used, except for the time stamp and the data provider's identifier. Time stamp is the time when the data for the report was retrieved. It is unique for each data submission. In the case of a revision file, the time stamp will change, and therefore it is not possible to re-send a report with the exact same name. The data retrieval time takes the format: year + month + day + hour + minute + second (14 characters, zeroes in the front where necessary). When a revision file is concerned, the data provider's identifier may change.

Example: December 2020 OFI report:

OFI_2020M12_FI12345678_FI01234562_20210129123456.CSV

GUIDELINE

7 (50)

Version 1.2 (29 April 2020)

3.2 File structure

A file consists of **one** reporter's OFI data.

A file comprises one batch record (000 record); zero or several loan and deposit records (LD record), general content records (REST record), security-by-security records (SBS record) and one balance sheet record (BS record).

The first record of the file is always the batch record. The sequence of the records other than the batch record does not matter. The following table shows the different record types and their identifiers.

Records in the file

| Record | Record type (first field) | Usage | Number of fields |
|------------------------|------------------------------|---------------------------------------|------------------|
| Technical batch record | 000 | Technical record that begins the file | 1 |
| Balance sheet record | BS | Balance sheet total ant other totals | 1 |
| Content record | LD | Loan and deposit record | 0N |
| Content record | REST | General content record | 0N |
| Content record | SBS | Security-by-security record | 0N |

There are three types of content records (LD, REST and SBS). These records have different structures.

Version 1.2 (29 April 2020)

4 RECORD DESCRIPTIONS

The following general rules apply to the records:

- Fields are separated from each other with a semicolon (ASCII 59). There is no semicolon after the last field of the row.
- The contents of record fields may not contain quotation marks, CR (*Carriage Return*) or LF (*Line Feed*) characters. The CR-LF character pair is added to the last row of the file.
- Records are separated from each other with the CR-LF character pair.
- Alphanumeric fields are demarcated with quotation marks. Quotation marks are not counted in the reported length of the field.
- Decimals, if any, of numeric values are separated with a comma.
- Numeric fields shall only include a negative sign.

| Structure | Usage |
|----------------|---|
| Number (x[,y]) | Indicates numeric data. Maximum length of the field in parentheses. Number of potential or mandatory decimals is shown with comma. The comma and following numbers are not obligatory if zero. For example format Number (18,2) indicates that the field may contain a maximum of 18 characters, of which 16 integers and 2 decimals. |
| Char (x) | Indicates alphanumeric data of a fixed number of characters. Length of the field in parentheses. Value of the field is either empty or contains the specified number of characters. |
| Varchar (x) | Indicates alphanumeric data comprising a variable number of characters. Maximum length of the field in parentheses. |

In numeric fields, the value zero is an acceptable mandatory value unless there is a specific validation rule in the field requiring a non-zero figure.

If there are no data to be entered in an alphanumeric field, the field can be left empty and without quotation marks.

Fields marked as reserved are left empty and without quotation marks. In record structures, these fields are specified as having the value "null".

9 (50)

Financial Stability and Statistics Department

Version 1.2 (29 April 2020)

If a code list or more than one code list are mentioned in connection with a field, the value entered in the field must be from one of the code lists provided (for example, country code can be chosen from ISO 3166 country list or international organisations code list).

The reporting lists used in reporting are presented in a separate file on the Bank of Finland website.

Financial Stability and Statistics Department

Version 1.2 (29 April 2020)

4.1 Batch record (000)

The batch record contains general technical information pertaining to the report. The report always includes one batch record, and it is the first record of the file. Before the other records of the file can be validated, the batch record must pass the validations.

4.1.1 Record fields and validations

| Seq | | | | | | Operator | |
|----------|--|-----------------------|-------------|------|---|----------|---|
| uen | Field | Code list | Form | Rule | Left-hand side | oporator | Right-hand side |
| ce 01 | Record type | 1. Record type | Char(3) | 001 | Value of field 1 | = | "000" |
| 01 | "000" = Batch record | 1. Record type | Char(3) | 001 | | _ | 000 |
| 02 | Type of data provider's identifier | 3. Type of identifier | Char(1) | 001 | Value of field 2 | = | "A" |
| | Valid VAT number of data providers operating in Finland. | | | | | | |
| 03 | Data provider's identifier | | Char(3), | 001 | Value of field 3 | \$ | null |
| | Valid VAT number of data providers operating in Finland without hyphen in format FINNNNNNN. | | VarChar(20) | 002 | IF the value of field 2 (Type of data provider's identifier) is "A", THEN the value of field 3 | = | Valid VAT number in format FINNNNNNN |
| 04 | Survey code | | Char(4) | 001 | Value of field 4 | = | "OFI" |
| 05 | Data type | 2. Data type | Char(1) | 001 | Value of field 5 | = | Mandatory |
| | "N"= Test file, not transmitted to the Bank of Finland (used both in the test and production environment) "T" = Test data; transmitted to the Bank of Finland (used in the test environment) "P" = Production data (used in the production environment) | | | | | | |
| 06 | Reporting period | | Char(7) | 001 | Value of field 6 | = | in format <yyyy>M<mm></mm></yyyy> |

11 (50)

Financial Stability and Statistics Department

Version 1.2 (29 April 2020)

| | | | 002 | Value of field 6 | = | Part of the file name OFI_ <yyy>M<mm>_<data provider's VAT number>_<reporter's VAT number>_<time stamp="">.CSV.</time></reporter's </data </mm></yyy> |
|----|--|------------|-------|------------------|-----------|--|
| 07 | Creation date and time | Char(14) | 001 | Value of field 7 | in format | <yyyy><mm><dd><hh><mm><ss ></ss </mm></hh></dd></mm></yyyy> |
| | Date and time at which report was created in format <yyyy><mm><dd><hh>< MM><ss></ss></hh></dd></mm></yyyy> | | 002 | Value of field 7 | = | Part of the file name OFI_ <yyyy>A01_<data provider's<br="">VAT number>_<reporter's vat<br="">number>_<time stamp="">.CSV.</time></reporter's></data></yyyy> |
| 08 | Number of rows | Number(7) |) 001 | Value of field 8 | = | (Matches) the number of rows in the report. |
| 09 | Reporter's comment | Varchar(50 | (00 | | | |

4.1.2 Examples

The batch record in the example below indicates that the file contains a test report comprising 122 rows. The correctness of the report is validated by the DCS2 service but the file is not forwarded to the Bank of Finland.

"000";"A";"FI12345671";"OFI";"P";"2020M12";"20210129123456";122;"Test report"

The batch record in the example below indicates that the report includes 1523 rows of production data for December 2020.

"000";"A";"FI12345671";"OFI";"P";"2020M12";"20210129123456";1523;

Version 1.2 (29 April 2020)

4.2 Loan and deposit record LD

Data on loans and deposits is reported in the LD content record. In addition to the format and mandatoriness rules, the field must meet the following conditions.

4.2.1 Record fields and validations

| Group | Seq uen | Field | Code list | Form | Rule | Left-hand side | Operator | Right-hand side |

GUIDELINE

4.7 Report-level validation rules

Department

The following validation rules are not concerned with individual fields but apply to combinations of several fields or the report as a whole.

4.7.1 General

Rule MURA.ALL.R1:

A report may only include the records of one (1) reporter. Report records (LD, REST, SBS, BS, ABS) must always have the same reporter's valid "A" = VAT code in the Reporter's identifier field (field 3).

Rule MURA.ALL.R2:

The report must include at least the 000 batch record and BS balance sheet record (quartely reporters) or ABS balance sheet record (annual reporters).

4.7.2 SBS records

Rule MURA.SBS.R1:

- The same combination of the SIN code (field 9) and Allocation of balance sheet items (field 4) always has the same values in the following fields, if data is entered in them:

- Instrument (field 6)
- Capital certainty (field 12)
- Type of issuer's identifier (field 36)
- Issuer's identifier (field 37)
- Issuer's name (field 38)
- Issuer's sector (field 39)
- Issuer's country of origin (field 40)

Rule MURA.SBS.R2:

- The same combination of the Internal identifier code (field 8) and Allocation of balance sheet items (field 4) always has the same values in the following fields, if data is entered in them:

47 (50)

Financial Stability and Statistics Department

Version 1.2 (29 April 2020)

- Instrument (field 6)
- ISIN code (field 9)
- Capital certainty (field 12)
- Type of issuer's identifier (field 36)
- Issuer's identifier (field 37)
- Issuer's name (field 38)
- Issuer's sector (field 39)
- Issuer's country of origin (field 40)

Rule MURA.SBS.R3:

- Security-by-security records can be divided into several rows in assets (A) and off-balance sheet items (O) according to the allocation of balance sheet items, transaction, nominal value and classification according to recognition in financial statements. There can be only one SBS record in the file with the same combination of the following fields:

- Reporter's identifier (field 3)
- Allocation of balance sheet items (field 4), which takes the value "A" or "O"
- Transaction (field 5)
- Internal identifier (field 8)
- Nominal value currency (field 15).

Rule MURA.SBS.R4:

- On the liabilities side (L), security-by-security records can be divided into several rows according to classification according to recognition in financial statements, and country of issuance. There can be only one SBS record in the file with the same combination of the following fields:

- Reporter's identifier (field 3)
- Allocation of balance sheet items (field 4), which takes the value "L"
- Internal identifier (field 8)
- Nominal value currency (field 15)
- Classification according to recognition in financial statements (field 18).

Financial Stability and Statistics Department GUIDELINE

48 (50)

Version 1.2 (29 April 2020)

4.7.3 Balance sheet check

Rule MURA.BS.R1 (Assets) Rule MURA.BS.R2 (Liabilities)

- The sum of balance sheet data¹ reported in LD, SBS and REST records must correspond to item "BALANCE SHEET TOTAL" reported in the BS record (field 14) as presented in the table below. Assets and liabilities are both summed up separately. Asset and liability items must correspond the "BALANCE SHEET TOTAL" reported in BS record to the accuracy of EUR 5,000 (+/-).

| Reported item: | Instruments included in the balance sheet and reported in the records |
|--|--|
| Record code: | Indicates the record in which the instruments concerned are reported. |
| Instrument: | Classification code of the instrument included in the balance sheet. |
| Allocation of | A = Asset and L = Liability |
| balance sheet items: | |
| Transaction: | S = Stock data |
| Operator: | Indicates which data must be summed up. |
| Record code: Instrument: Allocation of balance sheet items: Transaction: | Indicates the record in which the instruments concerned are reported. Classification code of the instrument included in the balance sheet. A = Asset and L = Liability S = Stock data |

¹ In the case of loans and deposits, interest payable must also be taken into account.
