

## Data collections have been added to the Reporter portal of the Bank of Finland's new reporting system

The maintenance break in Reporter portal of the Bank of Finland's new reporting system has ended and the Reporter Portal is now open for reporting MAPEQ, RATI and KOTI data collections. The opening of PEF reporting will be delayed by approximately two weeks. We will inform the reporters separately when the PEF Q3 reports can be submitted.

Access authorisations for the new Reporting System will operate via the Suomi.fi e-Authorisations service, and reporters will manage the access authorisations themselves. Reporters must have access authorisations, which the reporting entity has granted to them in the Suomi.fi service, before logging in to the Reporter Portal for the first time. The Bank of Finland (BoF) has published instructions on access authorisations for the Reporting System. In addition, the Suomi.fi e-Authorisations service provides its own instructions and support for using the service.

On the opening date, the Reporter Portal includes reporting obligations for those entities that report the following data collections:

- **MAPEQ** (Collection of payment and fraud data)
- **RATI** (MFI data collection)
- **KOTI** (Consolidated data collection)

The above-mentioned data collections will be reported via the BoF's Reporter Portal as of reference period 2024M09/2024Q3.

User instructions for the Reporting System have been published on the BoF's website: [Reporter portal guide](#)

The Reporting Portal can be accessed via the following web address:  
<https://reporting.bof.fi/>

Testing of the reporting is possible in Validation service:  
<https://validationservice-reporting.bof.fi>

We strongly recommend testing in the validation service with files submitted previously to production. Parties using the XML converter must ensure that reports previously approved in the DCS2 service also pass validation in the eREG validation service.
