

# DATA COLLECTION ON OTHER FINANCIAL INSTITUTIONS (OFI) RECORD STRUCTURE

Version: 2.1

Valid from: March 2023 – Reporting period concerned

Published: 23 January 2023

Used: 1 April 2023 – Validations based on the record structure applied in the DCS2 service.

Version	Date	Valid from	Revisions
1.0	13 January 2020	1 December 2020	First version of record structure.
1.1	16 March 2020	1 December 2020	Profit and loss account items available in REST record, coding for collaterals have been simplified in field 16 of LD record, a new record ABS have been added (for annual reporters).
1.2	29 April 2020	1 December 2020	Reporting of profit and loss account items in fields 12, 13 and 15 have been specified.
1.3	5 May 2020	1 December 2020	Reporting instructions of both BS and ABS records have been specified. Fields 13 and 14 have been removed in ABS record.
1.4	16 June 2020	1 December 2020	Two coding values related to a reporting of factoring have been added to the collateral field ("16") of LD record.
1.5	7 September 2020	1 December 2020	Rules "001" have been supplemented in fields 37, 41 and 42 of LD record.
1.6	12 November 2020	1 December 2020	Rule "005" has been added in field 19 and "004" in field 43. Values "221" and "222" have been added in field 7. Rule MURA.BS.R2 has been updated.
1.7	1 December 2020	1 December 2020	Deleted from the REST record in field 5 (=Transaction) the code value "F" and the re- lated validation rules in fields 12 (=Sector) and 15 (= Conversion currency).
1.8	10 December 2020	1 December 2020	Code value "L200" has been added to the instrument ("8") field of ABS record, rule "002" of field 8 has been updated, rule "002" of field 9 has been added. New rule MURA.ABS.R1 has been added.
1.9	28 June 2021	1 December 2020	New rule added to the SBS record fields 13 and 14. Numbering of rules has been changed on SBS record fields 13 and 14.
2.0	4 November 2021	1 December 2021	Code value "L800" has been added to the instrument ("8") field of ABS record and the rule "002" of field 8 has been updated.

2.1	30 June 2022	1 March 2022	Deleted validation 003 in REST record field 10. Sectoral code is lengthened to 6 characters. The condition concerning foreign issuers is removed from validation rule 001 from the SBS record field 23 and validation rules 001 and 002 combined.
	9 January 2023	1 March 2023	<ul> <li>Changes to validation rules of sector informations:</li> <li>LD record field 19 rules 002 ja 003 field 25 rules 005 and 006.</li> <li>REST record field 12 rules 003 and 004.</li> <li>SBS record field 28 rules 003 and 004 and field 39 rules 002 and 003.</li> <li>Code value "719" added in validation rule 001 of REST record field 10.</li> </ul>
	23 January 2023	1 March 2023	Corrected sector field validation rule code value "131323" $\rightarrow$ "131329".

# **1 INTRODUCTION**

This document describes the structure of records and the manner of submission of data to the Bank of Finland relating to the survey on other financial institutions ("OFI" or "MURA" in Finnish). OFI reporting instructions and classifications are provided in the document "Instructions for OFI statistical reporting".

The Bank of Finland can be contacted on questions relating to record structures and the submission of data at the email <u>MURA@bof.fi</u>.

23 January 2023 **BOF/FIN-FSA-UNRESTRICTED** Public

# **2 SUBMISSION OF DATA TO THE BANK OF FINLAND**

OFI data must be submitted to the Bank of Finland no later than the last banking day of the month following the reference period. The data are submitted electronically using the DCS2 service (Data Collection Service).

# 2.1 DCS data transfer

Reporters submit the data to the Bank of Finland using the DCS2 data collection service. The DCS2 is maintained by the service provider, i.e. the DCS2 operator. The DCS2 operator is Posti Messaging Oy.

The reporter (or alternatively the data provider) must order a user ID for the DCS2 service in the reporting portal at https://dcs.bof.fi. After the order for an ID has been approved, a key code list is generated for the user. The codes are needed, in addition to the user ID and password, for logging in the DCS2 service.

The DCS2 service is used to create a report file consisting of reported data as described in the record descriptions presented in this document. The file is validated at the DCS2 service for data content, e.g. the technical integrity of the data and the correctness of record field structures and contents. These validations are made as described in this document.

A validated and approved report file is transmitted to the Bank of Finland. Erroneous reports are not transmitted to the Bank of Finland; instead, the DCS2 service sends an error report to the data provider. Errors must be corrected and the entire report sent again via the DCS2 service. Correspondingly, when a correction needs to be made to a report that has already been sent, the entire report must be sent again via the DCS2 service.

# 2.2 Testing

Reporting may be tested in the DCS2 service's separate test environment at https://test.dcs.bof.fi by designating the contents of the report as test data (see batch record field 5). Test reports are sent to the operator in the usual manner and the data are validated according to this record structure.

23 January 2023 BOF/FIN-FSA-UNRESTRICTED Public

## **3 REPORT FILE**

Report files are created as CSV (Comma Separated Value) files using semicolons as separators. The character set used in the file must be UTF-8.

#### 3.1 Naming of file

The name of the file is the code that identifies the survey, "MURA", the period subject to reporting and the data provider's VAT identification number without hyphen (for those operating in Finland, starting with FI, 8 digits), the reporter's VAT number and time stamp.

MURA\_<YYYY>A01\_<Data provider's VAT number>\_<Reporter's VAT number>\_<time stamp>.CSV.

If the reporter corrects data that has already been sent, the same file name must be used, except for the time stamp and the data provider's identifier. Time stamp is the time when the data for the report was retrieved. It is unique for each data submission. In the case of a revision file, the time stamp will change, and therefore it is not possible to re-send a report with the exact same name. The data retrieval time takes the format: year + month + day + hour + minute + second (14 characters, zeroes in the front where necessary). When a revision file is concerned, the data provider's identifier may change.

Example: December 2020 OFI report:

MURA\_2020M12\_FI12345678\_FI01234562\_20210129123456.CSV

23 January 2023 BOF/FIN-FSA-UNRESTRICTED Public

### 3.2 File structure

A file consists of **one** reporter's OFI data.

A file comprises one batch record (000 record); zero or several loan and deposit records (LD record), general content records (REST record), security-by-security records (SBS record), balance sheet record for annual reporters (ABS record) and one balance sheet record (BS record). ABS record is meant only for annual reporters that do not report LD, REST or SBS records.

The first record of the file is always the batch record. The sequence of the records other than the batch record does not matter. The following table shows the different record types and their identifiers.

#### Records in the file

Record	Record type (first field)	Usage	Number of fields
Technical batch record	000	Technical record that begins the file	1
Balance sheet record	BS	Balance sheet total and other totals	1
Content record	LD	Loan and deposit record	0N
Content record	REST	General content record	0N
Content record	SBS	Security-by-security record	0N
Balance sheet record	ABS	Balance sheet record for annual reporters	0N

There are three types of content records (LD, REST and SBS). These records have different structures.

23 January 2023 BOF/FIN-FSA-UNRESTRICTED Public

# **4 RECORD DESCRIPTIONS**

The following general rules apply to the records:

- Fields are separated from each other with a semicolon (ASCII 59). There is no semicolon after the last field of the row.
- The contents of record fields may not contain quotation marks, CR (*Carriage Return*) or LF (*Line Feed*) characters. The CR-LF character pair is added to the last row of the file.
- Records are separated from each other with the CR-LF character pair.
- Alphanumeric fields are demarcated with quotation marks. Quotation marks are not counted in the reported length of the field.
- Decimals, if any, of numeric values are separated with a comma.
- Numeric fields shall only include a negative sign.

Structure	Usage
Number (x[,y])	Indicates numeric data. Maximum length of the field in parentheses. Number of potential or mandatory decimals is shown with comma. The comma and following numbers are not obligatory if zero. For example format Number (18,2) indicates that the field may contain a maximum of 18 characters, of which 16 integers and 2 decimals.
Char (x)	Indicates alphanumeric data of a fixed number of characters. Length of the field in parentheses. Value of the field is either empty or contains the specified number of characters.
Varchar (x)	Indicates alphanumeric data comprising a variable number of characters. Maximum length of the field in parentheses.

In numeric fields, the value zero is an acceptable mandatory value unless there is a specific validation rule in the field requiring a non-zero figure.

If there are no data to be entered in an alphanumeric field, the field can be left empty and without quotation marks.

Fields marked as reserved are left empty and without quotation marks. In record structures, these fields are specified as having the value "null".

23 January 2023 BOF/FIN-FSA-UNRESTRICTED Public

If a code list or more than one code list are mentioned in connection with a field, the value entered in the field must be from one of the code lists provided (for example, country code can be chosen from ISO 3166 country list or international organisations code list).

The reporting lists used in reporting are presented in a separate file on the Bank of Finland website.

23 January 2023 BOF/FIN-FSA-UNRESTRICTED Public

# 4.1.1 Batch record (000)

The batch record contains general technical information pertaining to the report. The report always includes one batch record, and it is the first record of the file. Before the other records of the file can be validated, the batch record must pass the validations.

# 4.1.2 Record fields and validations

Sequence	Field	Code list	Form	Rule	Left-hand side	Operator	Right-hand side

# 4.1.3 Examples

The batch record in the example below indicates that the file contains a test report comprising 122 rows. The correctness of the report is validated by the DCS2 service but the file is not forwarded to the Bank of Finland.

"000";"A";"FI12345671";"MURA";"N";"2020M12";"20210129123456";122;"Test report"

The batch record in the example below indicates that the report includes 1523 rows of production data for December 2020.

"000";"A";"FI12345671";"MURA";"P";"2020M12";"20210129123456";1523;

### 4.7 Report-level validation rules

The following validation rules are not concerned with individual fields but apply to combinations of several fields or the report as a whole.

4.7.1 General

#### Rule MURA.ALL.R1:

A report may only include the records of one (1) reporter. Report records (LD, REST, SBS, BS, ABS) must always have the same reporter's valid "A" = VAT code in the Reporter's identifier field (field 3).

#### Rule MURA.ALL.R2:

The report must include at least the 000 batch record and BS balance sheet record.

#### 4.7.2 SBS records

#### Rule MURA.SBS.R1:

- The same combination of the SIN code (field 9) and Allocation of balance sheet items (field 4) always has the same values in the following fields, if data is entered in them:

- Instrument (field 6)
- Capital certainty (field 12)
- Type of issuer's identifier (field 36)
- Issuer's identifier (field 37)
- Issuer's name (field 38)
- Issuer's sector (field 39)
- Issuer's country of origin (field 40)

#### Rule MURA.SBS.R2:

- The same combination of the Internal identifier code (field 8) and Allocation of balance sheet items (field 4) always has the same values in the following fields, if data is entered in them:

23 January 2023 BOF/FIN-FSA-UNRESTRICTED Public

- Instrument (field 6)
- ISIN code (field 9)
- Capital certainty (field 12)
- Type of issuer's identifier (field 36)
- Issuer's identifier (field 37)
- Issuer's name (field 38)
- Issuer's sector (field 39)
- Issuer's country of origin (field 40)

# Rule MURA.SBS.R3:

- Security-by-security records can be divided into several rows in assets (A) and off-balance sheet items (O) according to the allocation of balance sheet items, transaction, nominal value and classification according to recognition in financial statements. There can be only one SBS record in the file with the same combination of the following fields:

- Reporter's identifier (field 3)
- Allocation of balance sheet items (field 4), which takes the value "A" or "O"
- Transaction (field 5)
- Internal identifier (field 8)
- Nominal value currency (field 15).

# Rule MURA.SBS.R4:

- On the liabilities side (L), security-by-security records can be divided into several rows according to classification according to recognition in financial statements, and country of issuance. There can be only one SBS record in the file with the same combination of the following fields:

- Reporter's identifier (field 3)
- Allocation of balance sheet items (field 4), which takes the value "L"
- Internal identifier (field 8)
- Nominal value currency (field 15)
- Classification according to recognition in financial statements (field 18).

4.7.3 Balance sheet check

### Rule MURA.ABS.R1

The sum of balance sheet data reported in ABS record must correspond to item "BALANCE SHEET TOTAL" reported in the BS record (field 14). Assets and liabilities are both summed up separately. Asset and liability items must correspond the "BALANCE SHEET TOTAL" reported in BS record to the accuracy of EUR 5,000 (+/-).

### Rule MURA.BS.R1 (Assets) Rule MURA.BS.R2 (Liabilities)

The sum of balance sheet data<sup>1</sup> reported in LD, SBS and REST records must correspond to item "BALANCE SHEET TOTAL" reported in the BS record (field 14) as presented in the table below. Assets and liabilities are both summed up separately. Asset and liability items must correspond the "BALANCE SHEET TOTAL" reported in BS record to the accuracy of EUR 5,000 (+/-).

Reported item:	Instruments included in the balance sheet and reported in the records
Record code:	Indicates the record in which the instruments concerned are reported.
Instrument:	Classification code of the instrument included in the balance sheet.
Allocation of	A = Asset and L = Liability
balance sheet items:	
Transaction:	S = Stock data
Operator:	Indicates which data must be summed up.

<sup>&</sup>lt;sup>1</sup> In the case of loans and deposits, interest payable must also be taken into account.
