## Where is the Euro Area heading?

Breakfast seminar in European Chamber of  
Commerce, Hong Kong

Friday, April 22, 2016

# Advanced main economic regions: Recovery divergent and laborious

Sources: National statistical authorities and Macrobond.

# GDP growing again in the euro area

## GDP

--- Euro area      — High-rated countries\*\*      — GIIPS\*

Sources: Eurostat, Macrobond and Bank of Finland calculations.

\*Greece, Ireland, Italy, Portugal and Spain.

\*\*Austria, Belgium, Finland, France, Germany and the Netherlands.

patu32425@BKTGiips

# Still considerable differences among GIIPS countries

## GDP GIIPS

— Greece — Ireland — Italy — Portugal — Spain

Sources: Eurostat and Macrobond.

# World growth held back by structural factors

**%change on previous year  
(previous forecast)**

<b>GDP</b>	<b>2015</b>	<b>2016f</b>	<b>2017f</b>	<b>2018f</b>
EU22	1,5 (1,7)	1,4 (1,8)	1,7 (1,9)	1,7 (-)
United States	2,4 (2,6)	2,2 (3,0)	2,3 (2,8)	2,2 (-)
Japan	0,5 (0,6)	0,4 (1,1)	0,7 (1,0)	1,2 (-)
China	7 (7)	6 (6)	6 (6)	5 (-)
Russia	-4 (-4)	-3 (-2)	0 (1)	1 (-)
<b>World</b>	<b>2,8 (3,0)</b>	<b>2,8 (3,2)</b>	<b>3,2 (3,5)</b>	<b>3,2 (-)</b>
World trade	1,4 (1,8)	2,7 (3,7)	3,8 (4,5)	4,0 (-)

E22 = euro area, United Kingdom, Sweden and Denmark.

# World growth held back by structural factors

**%change on previous year  
(previous forecast)**

<b>Inflation</b>	<b>2015</b>	<b>2016f</b>	<b>2017f</b>	<b>2018f</b>
EU22	0 (0)	0,2 (1,1)	1,2 (1,7)	1,6 (-)
United States	0,1 (0,2)	1 (1,6)	2,3 (2,0)	2,2 (-)
Japan	0,8 (0,4)	0,2 (1,1)	1,5 (1,6)	1,4 (-)

f = forecast  
E22 = euro area, United Kingdom, Sweden and Denmark.

# Forecast risks

- ***Risks external to the euro area***
  - *A broad-based and strong slowdown in the global economy*
  - *E.g. a sudden halt in Chinese growth and decline in oil prices*
    - *Direct effects on demand*
    - *Balance sheet effects, dollar-denominated debt and exchange rates*
  
- ***Risks internal to the euro area***
  - *Euro area recovery still fragile*
    - *Long-term effects from the financial crisis*
      - *on individual euro area countries and banks*
    - *Political uncertainties*
      - *Brexit referendum on 23 June 2016*
      - *Handling of the refugee crisis*

# Unemployment declining but still very high in GIIPS countries

## Unemployment rates

\*Greece, Ireland, Italy, Portugal and Spain.

\*\*Austria, Finland, France, Germany and the Netherlands.

Sources: OECD, Macrobond and Bank of Finland calculations.

32424@Työttömyyskolmijako(ENG)

# Inflation very low in the euro area

## Harmonised Consumer Price Index

Sources: Eurostat, Macrobond and Bank of Finland calculations.

\*Austria, Belgium, Finland, France, Germany and the Netherlands.

\*\* Greece, Ireland, Italy, Portugal and Spain.

patu32426@hicpgiips

# Government debt projected to decrease in 2015 for the first time since 2007

## Public Debt

\* Austria, Finland, France, Germany and the Netherlands.

patu32422@EAAPP2(2)

## Objectives of the March monetary policy decisions:

- *To further ease financing conditions in euro area countries*
- *To foster increased lending*

### BACKGROUND:

- *Weakened outlook for global economy*
- *Tightening of financing conditions in early year*
- *Subdued inflation outlook*

## **Inflation outlook weakened and expectations subdued**

# Still weak consumer price inflation

## Euro area consumer price inflation (HICP)

\* Underlying inflation = inflation excluding energy, food, alcohol and tobacco.

Sources: ECB and Bank of Finland.

## What monetary policy decisions were taken on 10 March?

# Governing Council decisions in March 2016

- ***Monetary policy rates were lowered***
  - Key interest rate (MRO) to **0.0%** (change -5 bp)
  - Deposit facility rate to **-0.40%** (-10 bp)
- ***Monthly purchase volumes in the expanded asset purchase programme (EAPP) were expanded (by €20 bn) to €80 bn as of 1 April 2016***
  - Investment-grade bonds issued by non-banking-sector corporations were included on list of assets eligible for purchase
- ***A second series of targeted longer-term refinancing operations (TLTRO 2) will be launched in June 2016.***
  - These will enhance the transmission of monetary policy measures to the economy by encouraging banks to increase lending to the real economy.
  - Each operation will have a 4-year maturity, and the interest rate can be as low as the rate on the deposit facility.

## Forward guidance on monetary policy

- ***Purchases are intended to run until at least the end of March 2017, or beyond, if necessary, until inflation is on a sustained path towards a level below, but close to, 2%.***
- ***In view of the current outlook for price stability, the Governing Council expects the key ECB interest rates to remain at present or lower levels for an extended period of time, and well beyond the horizon of the asset purchases.***

## **Transmission of monetary policy:**

**The historically accommodative stance of monetary policy supports economic recovery and price stability through several transmission channels.**

# Condition of European banks

# Banking Union: main elements

## Banking Union: Euro area & opt-ins

### Single Supervisory Mechanism (SSM)

- Efficient, effective supra-national supervision with the ECB at the centre
- Clear separation of monetary policy and supervision

### Single Resolution Mechanism (SRM)

- Harmonised tools
- Investor/debtor responsibility (bail-in)
- Industry responsibility (resolution fund)
- No bail-out

### European Deposit Insurance Scheme (EDIS)

- Commission proposal
- Three sequential stages
- National schemes would co-exist alongside EDIS

## Single Rulebook (all EU)

### Bail-out of banks

- Expensive, politically loaded
- Case-by-case decisions (ESM)

**When this is properly done ...**

**...the likelihood of this is significantly reduced.**

# European Deposit Insurance Scheme (EDIS), proposal

- At present there is some harmonization but not yet a common framework.
- Member states differ in their position towards EDIS.
- According to the Commission proposal, EDIS would be developed over time in three stages:
- **PHASE 1: RE-INSURANCE (2017 - 2019)**
  - National Deposit Guarantee Schemes (DGS) could access EDIS funds only after exhausting its own resources.
  - EDIS funds will provide extra funds only up to a certain level.
- **PHASE 2: CO-INSURANCE (2020 - 2023)**
  - EDIS contributes from first euro of loss. The share contributed by EDIS would start at a low level and progressively increase.
- **PHASE 3: FULL INSURANCE National DGS (2024>)**
  - By gradually stepping up the share of risk that EDIS covers to 100%, EDIS will fully insure national DGS as of 2024.

- - - Core-countries, unweighted average \*\*

\*Non-core countries = CY, ES, GR, IE, IT and SI.

\*\*Core-countries = AT, BE, DE, FI, FR and NL.

\*\*\* 2015 covers all banks that have reported year-end financial statement by 16 March 2016

Source: SnI.

# The differential between bank lending and deposit rates has decreased

Source: European Central Bank.

## Non-performing loans weigh on banks

- *The problem of non-performing loans particularly affects mid-sized banks in countries hit by the crisis.*
- *The amount of non-performing loans has decreased in some countries, but progress is uneven and takes time.*
- *A swift reduction in non-performing loans is essential for banks' ability to grant new loans.*

## Tax-payers' or creditors' responsibility?

- ***The crisis resolution framework that entered into force at the beginning of the year emphasises creditor involvement in situations where a bank runs into trouble.***
- ***Functions critical to society can be preserved and problems dealt with in an orderly manner.***
- ***The transition to the new resolution framework will not be easy, but it is important to complete it.***

## Banks' position in a nutshell

- ***Banks are already in better shape, but challenges remain.***
- ***Strong economic growth will improve profitability and help reduce the amount of non-performing loans.***
- ***Reducing the amount of non-performing loans is a precondition for improving banks' ability to function.***
- ***Well capitalised banks are key to an effective transmission of monetary policy.***

**Thank you!**
