

# **MFI DATA COLLECTION (RATI) RECORD STRUCTURE**

**Version 1.7.7**

**Valid for reports:** December 2016 -

**Published:** 2 December 2016

**Applied in the DCS service:** January 2017

Version	Date	Validity	Changes
1.0	29 May 2009	1 June 2009	First version of record structure in Finnish.
1.0.1	17 June 2009	1 July 2009	<ul style="list-style-type: none"> <li>- Some errors corrected.</li> <li>- Instrument "343" FX Spot added to REST field</li> <li>- Validations relating to securitization and loan transfers in LD record added.</li> <li>- Validations relating to deposit maturities in LD record added</li> <li>- Name of loan instrument "45" changed to convenience credit card credit</li> <li>- Value "F" added to LD record field 05 Transaction, validation 003</li> </ul>
1.1	11 September 2009	14 September 2009	<p>Changes to validations of following LD record fields:</p> <ul style="list-style-type: none"> <li>- Securitization and loan transfers (field 9)</li> <li>- Purpose of loan (field 13)</li> <li>- Industrial classification (field 23)</li> <li>- Sector (securitization and loan transfers) (field 25)</li> <li>- ECB's auxiliary sectors (securitization and loan transfers) (field 26)</li> <li>- Book value excl. non-performing stock (field 34)</li> <li>- Original maturity (field 43)</li> <li>- Remaining maturity (field 44)</li> </ul> <p>Changes to validations of following SBS record fields:</p> <ul style="list-style-type: none"> <li>- Capital certainty (field 12)</li> <li>- Number of instruments (field 13)</li> <li>- Total nominal value (field 14)</li> <li>- Recognition in financial statements (field 18)</li> <li>- Total market value (clean price) (field 20)</li> <li>- Intra-group items (field 21)</li> <li>- Direct investment (field 22)</li> <li>- Dividends (field 23)</li> <li>- Issue date (field 30)</li> <li>- Maturity date (field 31)</li> <li>- Reporting of issuer data changed in cases where Allocation of balance sheet items takes the value "L"</li> </ul>

			<p>Changes to validations of following REST record fields:</p> <ul style="list-style-type: none"> <li>- Instrument (field 7)</li> <li>- Intra-group items (field 10)</li> <li>- Conversion currency (field 15), length of currency code fields changed to contain 3 characters. Special currency codes "003" and "UUU" added</li> </ul> <p>Other changes:</p> <ul style="list-style-type: none"> <li>- Validation rule RATI.SBS.R3</li> <li>- Combination FI, S.1312 (state government) is not permitted in any record.</li> </ul>
1.1.1	2 October 2009	5 October 2009	<p>Changes to validations of following REST record fields:</p> <ul style="list-style-type: none"> <li>- Sector (field 12), Country code (field 13), Conversion currency (field 15)</li> </ul> <p>Changes to validations of following SBS record fields:</p> <ul style="list-style-type: none"> <li>- Issuer's identifier (field 37)</li> </ul> <p>Changes to validations of following LD record fields:</p> <ul style="list-style-type: none"> <li>- Credit institution exempt from minimum reserves (field 20)</li> <li>- Name of credit institution exempt from minimum reserves (field 21)</li> </ul> <p>Misspellings corrected in some record fields.</p>
1.2	7 December 2009		<p>New report-level validation rules: RATI.000.R1 and RATI.000.R2</p> <p>Changes to validations of following SBS record fields:</p> <ul style="list-style-type: none"> <li>- Dividends (field 23)</li> <li>- Type of issuer's identifier</li> </ul> <p>Changes to validations of following 000 record fields:</p> <ul style="list-style-type: none"> <li>- Reporting period (field 06)</li> </ul> <p>Changes to validations of following 000 record fields:</p> <ul style="list-style-type: none"> <li>- Intra-group items (field 14)</li> </ul>

## INTRODUCTION

This document describes the structure of records and submission of data to the Bank of Finland relating to MFI data collection (RATI). RATI reporting instructions and classifications are described in document INSTRUCTIONS FOR MFI STATISTICAL REPORTING.

The Bank of Finland can be contacted on questions relating to record structures and submission of data. Please direct any questions to [Rahoitustilastot@bof.fi](mailto:Rahoitustilastot@bof.fi).

## 1 SUBMISSION OF DATA TO THE BANK OF FINLAND

**RATI data are submitted to the Bank of Finland no later than the 10<sup>th</sup> banking day of the month following the reference period. The data are submitted electronically using the DCS service (Data Collection Service).**

### 1.1 DCS service

Reporters submit the data to the Bank of Finland using the DCS service. The service is maintained by the service provider, ie the DCS operator. The DCS operator is Itella Information Oy.

The reporter (or alternatively the data provider) should first order a DCS service user ID via the ID order service at <https://sol.itella.net/ec/bof-tunnustilaus>. Once the ID order has been approved, the reporter will receive by post a key code card which is needed, in addition to user ID and password, for logging into the DCS system.

The DCS service is used to transmit a report file consisting of reported data as described in the record descriptions presented in this document. The file is validated at the DCS service for data content, eg the technical integrity of the data and the correctness of record field structures and contents. These checks are done as described in this document.

A validated and approved report file is transmitted to the Bank of Finland. Erroneous reports are not transmitted to the Bank of Finland; instead, the DCS service sends an error report to the data provider. Errors must be corrected and the entire report is sent again via the DCS service. Correspondingly, when a correction needs to be made to a report that has already been sent, the entire report must be sent again via the DCS service.

### 1.2 Testing

Reporting may be tested in the DCS service's separate test environment by designating the contents of the report as test data (see batch record field 5). Test reports are sent to the operator in the usual manner and the data are validated.

### 1.3 Problem situations

As part of the DCS service, the operator provides an Itella Information Service Desk service, available 24 hours a day, 7 days a week (24/7). The Service Desk can be contacted by phone, tel. +358 (0)20 452 9348, or by email: [information.fi@itella.com](mailto:information.fi@itella.com). Itella Information Service Desk provides advice in the following matters:

- problems with functioning of DCS service
- user IDs, passwords, key code lists
- data connection (VPN-secured FTP or SFTP)

The Bank of Finland provides advice on contents of report files and other matters, and related questions should preferably be directed to [rahoitustilastot@bof.fi](mailto:rahoitustilastot@bof.fi).

## 2 REPORT FILE

Report files are created as CSV (Comma Separated Value) files using semicolons as separators.

The character set used in the file must be ISO Latin 9 (ISO 8859-15).

### 2.1 Naming of file

The name of the file is the code that identifies the survey, ie RATI, the month subject to reporting and the reporter's business ID (8 digits, no hyphen).

RATI\_<YYYY>M<MM>\_<Reporter's business ID>.CSV.

If the reporter corrects data that has already been sent, the same file name must always be used. The DCS operator deletes the file after processing it. If the transfer directory still contains a previous (unprocessed) file, overwriting or deletion of the previous file prevents the processing of the corrected file.

Example: February 2009 RATI report:

RATI\_2009M02\_01234562.CSV

### 2.2 File structure

A file consists of **one** reporter's RATI data.

A report comprises one batch record (000 record); zero or several loan and deposit records (LD record), general content records (REST record), security-by-security records (SBS record), impairment records (IL record); and one balance sheet record (BS record).

The first record in the file is always the batch record. Except for the batch record, the records can be in any order. The following table gives the different record types.

## Records in the fields

Record	Record type (first field)	Usage	Number of fields
Technical batch record	000	Technical record that begins the file	1
Balance sheet record	BS	Balance sheet total and other totals	1
Content record	LD	Loan and deposit record	0...N
Content record	IL	Impairment record	0...N
Content record	REST	General content record	0...N
Content record	SBS	Security-by-security record	0...N

There are four types of content records (LD, IL, REST and SBS) with different structures.

### 3 RECORD DESCRIPTIONS

The following general rules apply to the fields:

- Fields are separated from each other with a semicolon (ASCII 59). There is no semicolon after the last field of the row.
- The contents of record fields may not contain quotation marks, CR (Carriage Return) or LF (Line Feed) characters. The CR-LF character pair is added to the last row of the file.
- Records are separated from each other with the CR-LF character pair.
- Alphanumeric fields are demarcated with quotation marks. Quotation marks are not counted in the length of the field.
- Decimals, if any, of numeric values are separated with a comma.
- Numeric fields shall only include a negative sign.

Structure	Usage
Number(x[,y])	Indicates numeric data. Maximum length of the field in parentheses. Number of potential or mandatory decimals is shown with comma. The comma and following numbers are not obligatory if zero. For example format <i>Number (18,2)</i> indicates that the field may contain a maximum of 18 characters, of which 16 integers and 2 decimals.
Char(x)	Indicates alphanumeric data of a fixed number of characters. Length of the field in parentheses. Value of the field is either empty or contains the specified number of characters.
Varchar(x)	Indicates alphanumeric data comprising a variable number of characters. Maximum length of the field in parentheses.

In numeric fields the value zero is an acceptable mandatory value unless there is a specific validation rule in the field requiring a non-zero figure.

If there are no data to be entered in an alphanumeric field, the field can be left empty and without quotation marks.

Fields marked *Reserved* are left empty and without quotation marks. These fields have the value *null* in record descriptions below.

If there are no data to be entered in the last fields of a record, the semicolons of those fields can be omitted.

If more than one code list is mentioned in connection with a field, the value entered in the field must be from one of the code lists provided (for example, country code can be chosen from ISO 3166 country list or international organizations code list).

Code lists used in the reporting are available in a separate XML-file on the Bank of Finland website.

### 3.1 Batch record 000

The batch record (record 000) contains general information on the record. The report always includes one batch record, and it is the first record of the file. Before other records in the file can be validated, the batch record must pass the validation process.

#### 3.1.1 Record fields and validation

Sequence	Field	Code list	Structure	Rule	Left-hand side	Operator	Right-hand side
01	Record type	1: Record type	Char(3)	001	Value of field 1	=	"000"
02	Type of data provider's identifier	3: Type of identifier	Char(1)	001	Value of field 2	=	Mandatory
03	Data provider's identifier		VarChar(20)	001	Value of field 3	<>	null

				002	IF value of field 2 (Type of data provider's identifier) is "Y", THEN value of field 3	=	Valid business ID
<b>04</b>	<b>Survey code</b>		Char(4)	001	Value of field 4	=	"RATI"
<b>05</b>	<b>Data type</b> "N"= Test data; not transmitted to the Bank of Finland (used in the test environment) "T"= Test data, transmitted to the Bank of Finland (used in the test environment) "P"= Production data (used in the production environment)	2: Data type	Char(1)	001	Value of field 5	=	Mandatory
<b>06</b>	<b>Reporting period</b>		Char(7)	001	Value of field 6	=	in format <YYYY>M<MM>
				002	Value of field 6	=	Part of file name RATI_<YYYY>M<MM>_<Reporter's business ID>.CSV in format <YYYY>M<MM>
<b>07</b>	<b>Creation date and time</b>		Char(12)	001	Value of field 7	=	in format <YYYY><MM><DD><HH><MM>
<b>08</b>	<b>Number of rows</b>		Number(7)	001	Value of field 8	=	Number of rows in the report
<b>09</b>	<b>Reporter's comment</b> Possible short comment relating to the report.		Varchar(500)				

### 3.1.2 Examples

The batch record in the example below indicates that the file contains a test report comprising 122 rows. The correctness of the report is validated by the DCS service but the file is not transmitted to the Bank of Finland.

"000";"Y";"12345671";"RATI";"N";"2009M02";"200903051234";122;"Test report"

The batch record in the example below indicates that the file contains 1523 rows of production data for February 2009.

"000";"Y";"12345671";"RATI";"P";"2009M02";"200903051234";1523

### 3.2 Loans and deposits record LD

Data on loans and deposits are reported in the LD content record. In addition to rules on structure and obligatoriness, the record must also fulfil the following conditions.

#### 3.2.1 Record fields and validation

Group	Seq.	Field	Code list	Structure	Rule	Left-hand side	Operator	Right-hand side
Record type	01	Record type	1: Record type	Char(2)	001	Value of field 1	=	"LD"
Data on reporter	02	Type of reporter's identifier	3: Type of identifier	Char(1)	001	Value of field 2	=	"Y"
	03	Reporter's identifier		Char(8)	001	Value of field 3	in format	"NNNNNNNN"
Item classifications	04	Allocation of balance sheet items "A" = Asset "L" = Liability "O" = Off-balance sheet item	5: Allocation of balance sheet items	Char(1)	001	Value of field 4	=	Mandatory
	05	Transaction "S" = Stock "F" = Flow "N" = New deposit	6: Transaction	Varchar(3)	001	IF value of field 4 (Allocation of balance sheet items) is "A", THEN value of field 5	=	"S", "F", "N01", "N02" OR "D"
		Agreement "N01" = Genuine new loan agreement			002	IF value of field 4 (Allocation of balance sheet items) is "L", THEN value of field 5	=	"S" OR "N"

		"N02" = Renegotiated loan agreement

### 3.4 Content record REST

#### 3.4.1 Record fields and validation

The general content record REST is used for reporting balance sheet data not related to securities, loans and deposits. Derivatives flow data (net payments) and data on commercial and local authority paper arranged by banks are also reported here.

Group	Seq.	Field	Code list	Structure	Rule	Left-hand side	Operator	Right-hand side

### 3.6 Balance sheet record BS

#### 3.6.1 Record fields and validation

The balance sheet record BS is used for reporting eg the balance sheet total. In addition to rules on structure and obligatoriness, the record must also fulfil the following conditions.

	Seq.	Field	Code list	Structure	Rule	Left-hand side	Operator	Right-hand side
Record type	01	<b>Record type</b>	1: Record type	Char(2)	001	Value of field 1	=	"BS"
Data on reporter	02	<b>Type of reporter's identifier</b>	3: Type of identifier	Char(1)	001	Value of field	=	"Y"
	03	<b>Reporter's identifier</b>		Char(8)	001	Value of field 3 is in format	=	"NNNNNNNN"
	04	<b>Reporting frequency</b>	4: Reporting frequency	Char(1)	001	Value of field 4	=	"M" or "Q"
Item classifications	05	<b>Reporter's name</b>		Varchar (100)	001	Value of field 5	=	Mandatory
	06	Reserved			001	Value of field 6	=	null
	07	<b>Number of housing loan customers (households)</b>		Number (10)	001	IF value of field 7 is entered, the value	>	0
	08	<b>Number of households' deposit accounts</b>		Number (10)	001	IF value of field 8 is entered, the value	>	0
Number of deposit accounts	09	<b>Number of deposit accounts</b>		Number(10)	001	IF value of field 9 is entered, the value	>	0
	10	<b>Number of transferable overnight deposit accounts</b>		Number(10)	001	IF value of field 10 is entered, the value	>	0

					002	IF value of field 10 is entered, the value	<=	Value of field 9 (Number of deposit accounts)
	<b>11</b>	<b>Number of transferable overnight deposit accounts: Internet/PC-linked</b>		Number(10)	001	IF value of field 11 is entered, the value	>	0
					002	IF value of field 11 is entered, the value	<=	Value of field 10 (Number of transferable overnight deposit accounts)
Number of employees and offices	<b>12</b>	<b>Number of offices</b>		Number(6)	001	IF value of field 12 is entered, the value	>	0
	<b>13</b>	<b>Number of employees</b>		Number(10)	001	IF value of field 13 is entered, the value	>	0
Balance sheet total	<b>14</b>	<b>Balance sheet total</b>		Number (20,2)	001	Value of field 14	>	0
					002	Value of field 14	=	Value must correspond the sums of reported asset and liability items to the accuracy of EUR 5,000 (+/-)
Number of other overnight deposit accounts	<b>15</b>	<b>Number of other overnight deposit accounts</b>		Number(10)	001	IF value of field 15 is entered, the value	>	0
					002	IF value of field 15 is entered, the value	<=	Value of field 9 (Number of

								deposit accounts)
	16	<b>Number of other overnight deposit accounts: Internet/PC-linked</b>		Number(10)	001	IF value of field 16 is entered, the value	>	0
					002	IF value of field 16 is entered, the value	<=	Value of field 15
Number of payment accounts	17	Number of payment accounts		Number (10)	001	IF value of field 17 is entered, the value	>=	0
Number of accounts for electronic money	18	Number of accounts for electronic money		Number (10)	001	IF value of field 18 is entered, the value	>=	0
Number of payment accounts with basic features opened	19	Number of payment accounts with basic features that have been opened		Number(10)	001	IF value of field 19 is entered, the value	>=	0
Number of applications for payment accounts with basic features refused	20	Number of applications for payment accounts with basic features that have been refused		Number(10)	001	IF value of field 20 is entered, the value	>=	0
Number of consumer payment accounts switched	21	Number of consumer payment accounts that have been switched		Number(10)	001	IF value of field 21 is entered, the value	>=	0
Number of applications	22	Number of applications for switchin consumer payment		Number(10)	001	IF value of field 22 is entered, the value	>=	0

for switchin consumer payment accounts refused		accounts that have been refused

### 3.6.2 Examples

"BS";"Y";"12345671";"M";"Abc";;;;100;50;40;100;1000;

### 3.7 Report-level validation rules

The following validation rules do not relate to individual fields but pertain to a combination of several fields or the report on the whole.

#### 3.7.1 Coherency

**Rule RATI.ALL.R1**

- The report file can only contain the report of one (1) reporter. Hence, field *Reporter's identifier* (field 3) must have identical values in batch record 000 and content records (LD, IL, REST, SBS and BS).

**Rule RATI.ALL.R2**

- The report file must include at least both the 000 record and the BS record.

#### 3.7.2 SBS records

**Rule RATI.SBS.R1**

Version 1.7.7  
(2 December 2016)

- The same combination of fields *ISIN code* (field 9) and *Allocation of balance sheet items* (field 4) has always same values in the following fields, if data is entered in them.

- Instrument (field 6)
- Capital certainty (field 12)
- Type of issuer's identifier (field 36)
- Issuer's identifier (field 37)
- Issuer's name (field 38)
- Issuer's sector (field 39)
- Issuer's home country (field 40)

#### **Rule RATL.SBS.R2**

- The same combination of fields *Internal identifier* (field 8) and *Allocation of balance sheet items* (field 4) has always same values in the following fields, if data is entered in them.

- Instrument (field 6)
- ISIN code (field 9)
- Capital certainty (field 12)
- Type of issuer's identifier (field 36)
- Issuer's identifier (field 37)
- Issuer's name (field 38)
- Issuer's sector (field 39)
- Issuer's home country (field 40)

#### **Rule RATL.SBS.R3**

- Security-by-security records can be divided into several rows in assets (A) and off-balance sheet items (O) according to the allocation of balance sheet items, transaction, nominal value and classification according to recognition in financial statements. There can be only one SBS record in the file with the same combination of the following fields:

- Reporter's identifier (field 3)
- Allocation of balance sheet items (field 4), which takes the value "A" or "O"
- Transaction (field 5)
- Internal identifier (field 8)

- Nominal value currency (field 15)

**Rule RATL.SBS.R4**

- On the liabilities side (L), security-by-security records can be divided into several rows according to classification according to recognition in financial statements, and country of issuance. There can be only one SBS record in the file with the same combination of the following fields:

- Reporter's identifier (field 3)
- Allocation of balance sheet items (field 4), which takes the value "L"
- Internal identifier (field 8)
- Nominal value currency (field 15)
- Classification according to recognition in financial statements (field 18)

### 3.7.3 Balance sheet check

**Rule RATL.BS.R1 (Assets)****Rule RATL.BS.R2 (Liabilities)**

-The sum of balance sheet data<sup>1</sup> reported in LD, SBS and REST records must correspond to item "BALANCE SHEET TOTAL" reported in the BS record (field 14) as presented in the table below. Assets and liabilities are both summed up separately. Asset and liability items must correspond the "BALANCE SHEET TOTAL" reported in BS record to the accuracy of EUR 5,000 (+/-).

Reported item:	Instruments included in the balance sheet and reported in the records
Record code:	Indicates the record in which the respected instruments are reported.
Instrument:	Classification code of the instrument included in the balance sheet.
Allocation of balance sheet items:	A = Asset and L = Liability.
Transaction:	S = Stock data .
Operator:	Tells which data must be summed up.

---

<sup>1</sup> In the case of loans and deposits, interest payable must also be taken into account.

**RULE RATI.BS.R1 (Assets)**
