1 INTRODUCTION

The Bank of Finland collects data from investment firms, mutual funds, companies, financial and insurance institutions, municipalities and the central government on a monthly basis on securities held in custody and securities-based assets and liabilities. This data is used particularly by the Bank of Finland, Statistics Finland and the European Central Bank (ECB) in the compilation of financial and balance of payments statistics for Finland and the euro area. In addition, the data is used in the Bank of Finland for carrying out the ESCB-related tasks (such as monetary policy and prudential oversight). Statistical data is sent to EU and international institutions, of which the most important is the ECB. The statistics are published for use by the public on, for example, the Internet sites of the Bank of Finland and the ECB.

The Bank of Finland's authority to obtain information is based on the following legal provisions: sections 26 and 28 of the Act on the Bank of Finland (214/1998), Council Regulation (2533/1998, as amended by Regulation 951/2009) concerning the collection of statistical information by the European Central Bank and the ECB Regulation (ECB/2012/24 as amended by Regulation 2015/18, 2016/12 and 2018/7) concerning statistics on holdings of securities. The ECB guidelines ECB/2004/15 and ECB/2007/3 require a security-by-security data collection method.

This document describes the record structure used in the submission of data by reporting institutions.

2 SUBMISSION OF DATA TO THE BANK OF FINLAND

The report sent to the Bank of Finland on a monthly basis contains a statement on securities-based assets and liabilities in respect of securities with and without ISIN codes as well as on securities underlying repo and lending agreements.

The reports must be submitted to the Bank of Finland on the 10th banking day of the month following the reporting month, at the latest.

The data to be reported is described in more detail in separate reporting instructions for security holders and issuers.¹

¹ Reporting instructions – Survey of security-based assets and liabilities of nonfinancial corporations, financial corporations and central government (SAVE), Bank of Finland.

30 September 2019
BOF/FIN-FSA-UNRESTRICTED
Public

2.1 DCS2 data transfer

The data is submitted by the data provider or reporting entity to the Bank of Finland using the DCS2 service (Data Collection Service). The DCS2 service is maintained by the service provider, ie the DCS2 operator.

The reporting entity is responsible for reporting the data on a monthly basis to the DCS2 operator. For the purposes of data transfer, it is crucial that reporting entities compile a file with record structures as presented in this document.

The DCS2 operator acts as an intermediary and provides a suitable technical service platform. The service provider ensures the technical integrity and correctness of data submitted by the data provider and submits the validated data to the Bank of Finland.

When a correction needs to be made to a report that has already been sent, the entire report must be sent again to the DCS2 operator.

Separate instructions apply to reporting entities' procedures with the DCS2 operator.

2.2 Testing

Reporting may be tested by marking the contents of the report as test data (see batch record field 5). Test reports are sent to the operator in the usual manner.

3 REPORT FILE

Report files are created as CSV (Comma Separated Value) files using a semicolon as the separator.

The character set used in the file must be UTF-8.

30 September 2019
BOF/FIN-FSA-UNRESTRICTED
Public

3.1 File structure

The file consists of a *batch record* and a variable number of *content records* describing actual data to be reported. The batch record is on the first row of the file.

Record type	Record ID (field 1)
Batch record	000
Content record	SBS

3.2 Naming of file

The name of the file consists of the code identifying the survey, ie 'SAVE', the month subject to reporting, the data provider's VAT number, the reporter's VAT number and the time stamp.

SAVE_<YYYY><Frequency><MM>_<Data provider's VAT number>_<Reporter's VAT number>_<time stamp>.CSV

Time stamp is the time when the report has been created and is unique for each data submission. Thus, the file name must change e.g. when sending a revision file.

Both fields for the VAT number must be filled, even if the data provider is the same as the reporter.

Example: September 2019 SAVE report:

SAVE_2019M09_FI01234562_FI01234564_20190901135000.CSV

3.3 Validation of file

The DCS2 operator validates the technical correctness of the report file. Validation is conducted at file, record and field level. Validation is performed in connection with data transfer and the reporting entity is immediately informed of possible errors.

In addition, the Bank of Finland conducts its own reviews of content on validated files transmitted by the DCS2 operator.

4 RECORD DESCRIPTIONS

The following general rules apply to the records:

- Fields are separated from each other with a semicolon (ASCII 59). There is no semicolon after the last field of the row.
- The contents of record fields may not contain quotation marks or CR (Carriage Return) or LF (Line Feed) characters.
- Records are separated from each other with the CR-LF character pair. The CR-LF character pair is added also to the last row of the file.
- Alphanumeric fields are demarcated with quotation marks. Quotation marks are not counted in the length of the field.
- Decimals, if any, of numeric values are separated with a comma.
- Numeric fields shall only include a negative sign.

Structure	Explanation
Number (x [, y])	Indicates numeric data. The maximum length of the field is given in parentheses. The number of potential decimals is shown with a comma. The comma and data after the comma are not obligatory if they are zeros. For example, format 'Number (18,2)' indicates that the field may contain a maximum of 18 characters, of which 16 are integers and 2 decimals.
Char(x)	Indicates alphanumeric data comprising a fixed number of characters. The length of the field is given in parentheses. The value of the field is given either by leaving the field empty or entering the number of characters given in parentheses.
Varchar(x)	Indicates alphanumeric data comprising a variable number of characters. The maximum length of the field is given in parentheses.

In numeric fields the zero value is an acceptable mandatory value unless there is a specific validation rule in the field requiring another figure than zero.

If there is no data to be entered in an alphanumeric field, the field can be left empty and without quotation marks.

Fields marked as 'Reserved' are left empty and without quotation marks.

30 September 2019
BOF/FIN-FSA-UNRESTRICTED
Public

If more than one code list may be used for reporting data in a specific field, the value entered in the field must be found in one of the code lists provided (for example, country code can be chosen from the code list for countries according to ISO 3166 standard or the code list for international organisations).

Not all values in a code list are necessarily usable. For example, the sectoral classification is based on Statistics Finland's Classification of Sectors 2012, but not all sector codes are possible in this survey.

4.1 Batch record

The batch record (000 record) contains general information on the report. The report always includes one batch record, and it is the first record in the file.

4.1.1 Fields in the record

Sequence	Field	Code list	Structure	Rule	Left side	Operator	Right side
1	Record type "000" = Batch record	1: Record type	Varchar (4)	001	Value of 000 record field 1 (Record type)	=	"000"
2	Type of reporting entity's identifier A = 'ALV-tunnus' denoting the VAT number	3: Type of identifier	Char (1)	001	Value of 000 record field 2 (Type of data provider's identifier)	=	"A"
3	Reporting entity's identifier VAT number without hyphen in		Varchar (20)	001 002	Value of 000 record field 3 (Data provider's identifier) Value of 000 record field 3 (Data provider's identifier)	= is in format	Valid VAT number FI<NNNNNNNN>

BOF/FIN-FSA-UNRESTRICTED
Public

	format FINNNNNNNN						
4	Survey code SAVE = Survey on securities-based assets and liabilities of nonfinancial corporations, financial corporations and central government		Varchar (5)	001	Value of 000 record field 4 (Survey code)	=	"SAVE"
5	Data type N = Test file, not transmitted to the Bank of Finland T = Test file, transmitted to the Bank of Finland P = Production data	2: Data type	Char (1)	001	Value of 000 record field 5 (Data type)	=	"N", "T" OR "P"
6	Reporting period Month subject to reporting in format <YYYY>M<MM> (= year-letter M for monthly reporting frequency-month)		Char (7)	001 002	Value of 000 record field 6 (Reporting period) Value of 000 record field 6 (Reporting period)	is in format =	<YYYY>M<MM> Part of file name "SAVE_<YYYY>M<MM>_<Data provider's VAT number>_<Reporter's VAT number>_<time stamp>.CSV" in format <YYYY>M<MM>

30 September 2019
BOF/FIN-FSA-UNRESTRICTED
Public

7	Creation date Date and time at which the report was created in format <YYYY><MM><DD><HH><MM><SS>		Char (14)	001	Value of 000 record field 7 (Creation date and time)	is in format	<YYYY><MM><DD><HH><MM><SS>
8	Number of rows Number of rows in the file including batch record		Number (10)	001	Value of 000 record field 8 (Number of rows)	=	Number of rows in the file
9	Reporting entity's comment Possible short comment by the reporting entity		Varchar (500)				

4.1.2 Example

The batch record in the example below indicates that the test report includes 1523 rows in September 2019. The test report is not transmitted to the Bank of Finland. It is used for validating the report format with the DCS2 operator.

"000"; A;"FI01234562"; SAVE"; N;"2019M09";20191002125412";1523;" This is a test report."

30 September 2019
BOF/FIN-FSA-UNRESTRICTED
Public

The batch record in the example below indicates that the report includes 1523 rows of production data in September 2019. The report is transmitted to the Bank of Finland.

```
"000";"A";"FI01234562";"SAVE";"P";"2019M09";"20191002125414";1523;
```

4.2 Content record

The actual securities-based assets and liabilities, repos and lending agreements are reported in content records.

4.2.1 Content record fields

A content record includes the following fields:

Group	Sequence	Field	Code list	Structure	Rule	Left side	Operator	Right side
Record type	1	Record type SBS =Security-by-security record	1: Record type	Varchar (4)	001	Value of SBS record field 1 (Record type)	=	"SBS"
	2	Type of reporting entity's identifier A = VAT number	3: Identifier type	Char (1)	001	Value of SBS record field 2 (Type of reporting entity's identifier)	=	"A"
	3	Reporting entity's identifier VAT number of company on which data is reported, without hyphen, in format FINNNNNNNN.		Varchar (20)	001 002	Value of SBS record field 3 (Reporting entity's identifier) Value of SBS record field 3 (Reporting entity's identifier)	= is in format	Valid VAT number FI<NNNNNNNN>
Classifications	4	Category Security category code for conceptual classification of security.	4: Category	Char (1)	001	Value of SBS record field 4 (Category)	=	"A", "L" OR "R"
	5	Contract type	5: Contract type	Char (2)	001	IF the value of SBS record field 4 (Category) = "R",	=	"RB", "RS", "LB" OR "LS"

Rule SAVE.SBS.R2

- Reporter's data on one foreign asset or liability must be reported on one row. There can be only one SBS record in the file with the same combination of fields:
 - Reporting entity's identifier (field 3)
 - Category (field 4)
 - Contract type (field 5)
 - Internal identification code (field 8)
 - Contracting party's home country (field 29).

Rule SAVE.SBS.R3

- Data relating to the same ISIN code must be reported as aggregated data in the selected category and contract type. If a value is reported for ISIN code (field 9), there can be only one internal identification code (field 8) for a specific individual ISIN code among securities reported with the selected combination of category (field 4) and contract type (field 5).

Rule SAVE.SBS.R4

- A security reported under repo and lending agreements and sold or delivered to a non-resident must also be reported as a security-based asset. An ISIN code (field 9) reported with category R (field 4), contract types RS or LS (field 5) must be found in SBS records among ISIN codes reported with category A.

Rule SAVE.SBS.R5

- A file may contain data on one reporting company only. There can be only one reporting entity identifier (field 3) in SBS records.
